

# University of Nebraska—Lincoln

## Summer Weather Camp

Sunday June 9 – Friday June 14, 2019

This is a UNL Big Red Residential Camp  
UNL is a member of the National Weather Camp Program

### Discover Weather and Climate Science

Come and find out how scientists observe and forecast the weather as well as monitor the changing climate. During the week, campers will use instruments to make their own weather observations; learn how to forecast the weather; visit with National Weather Service forecasters; learn about the local weather and climate of Nebraska from tornadoes to blizzards; explore how drones are used in research; and, learn about storm preparedness. We will conduct experiments throughout the week inside the classroom as well as outdoors to demonstrate basic weather and climate processes. We will also explore weather and storm photography. Participants will get to meet actual scientists and learn more about weather and climate related careers. Spend the week with other students who enjoy weather and science just like you! Hosted and taught by the University of Nebraska-Lincoln, Earth and Atmospheric Sciences Department, Geography Program and the College of Arts and Sciences.

### Related Careers:

*Weather Forecaster, Television Weathercaster, Weather and Climate Researcher, Applied Climatologist, Climate Data Resource Specialist, Planning Agencies, Environmental Protection Agency, Science Teacher.*
